Powers of the Praetorian

Praetors are essentially Agents of the Throne and High Ministers which oversee functionality and operations of super-ministries of the Imperial Republic Government. Together with the Executor they make up the Prime Council and have the following special powers:

- Execute the Prime Directive
- Weld and use an Ultimate Authorization Code
- Issue orders/commands on behalf of the Throne in person or via official communique

Ultimate Authorization Codes

Officers of the Prime Directive are issued Alpha Green security clearances at the discretion of the Supreme Ruler of the Imperial Republic. With this security clearance they are issued an ultimate authorization code, similar in use, power, and access to the military's command authorization codes. Ultimate Authorization is the power and authority of the Throne itself, and with it a welder can command and carry out the Prime Directive on behalf of the Throne as if the welder sat upon the very Throne itself. These codes are five to seven digits and must be used in conjunction with the welder's voiceprint and palm/retinal scan. Ultimate Authorization Codes allow a welder to:

- Independently initiate self-destruct of a specific facility or Imperial Republic ship
- Raise or Lower the shield of any planet, facility, or vessel
- Priority clearance and/or escort through any defense line, security grid, fleet, blockade, etc.
- Gain access to any secure facility, ship, area, or data
- Commandeer any resource (including state & military assets) of the Imperial Republic
- Fire a superweapon (requires 2 UAC's or one of the highest level)
